

# Abhishek Kasni

Computer Science graduate with a foundation in data structures, algorithms, and full-stack web development. Skilled in building responsive applications using React, Tailwind CSS, Python, Django, and recently started studying FastAPI with additional experience in Java for problem-solving and backend logic. Completed multiple academic and personal projects demonstrating strong problem-solving skills, attention to detail, and ability to learn quickly. Eager to contribute to a collaborative engineering team and grow as a software developer.

## WORK EXPERIENCE

### Solitera Software

Cross Platform Developer with Flutter(primarily android)

Early 2022

- Got selected for the role but have to immediately drop off because of some personal reasons.

## EDUCATION

### Rao Pahalad Singh College of Enginnering and Technology

Bachelor of Technology, Computer Science and Engineering - 72%

August 2022

- studied core subjects like DSA, DBMS, Computer Networking, OS, Programming languages, introduction to Machine Learning and Artificial Intelligence, Theory of Computation, etc. as per university curriculum.

## PROJECT

### Chai Thread

July 2025

- Developed a Twitter-like social media platform using Django (backend) and Bootstrap (frontend) with complete CRUD functionality for posts, along with features to save favorites and repost content. Implemented secure user authentication and structured the application for scalability, while intentionally deferring the follow/unfollow system to a planned migration with React and Django REST Framework for API-driven extensibility.

### Rogue Mind

September 2025

- Built a full-stack blogging platform using React, Redux Toolkit, Tailwind CSS, React Hook Form, and a Rich Text Editor, with Appwrite providing authentication and backend services. Implemented complete CRUD functionality for blog posts and secure user login/registration via Appwrite Auth, while ensuring the project remained free from vendor lock-in through modular architecture and open-source tooling. Designed a clean, responsive UI and managed global state efficiently with Redux Toolkit, enabling a smooth and scalable blogging experience.

## SKILLS

- Python, Java, JavaScript, React, Redux Toolkit, Tailwind CSS, Bootstrap, HTML, CSS, Django, FastAPI, Appwrite, SQLite, PostgreSQL, REST APIs, CRUD Operations, Authentication & Authorization, Git, GitHub, Responsive Design, VS code, IntelliJ Idea
